

Produktblad sE Electronics V7-X

sE Electronics V7-X Dynamic Instrument Mic - Capture the full depth & expression of all of your instruments.

Powerful. Natural. Focused. A supercardioid

dynamic instrument microphone that lifts the sonic curtain in front of your sources, connecting listeners with your performance at a whole new level. The sibling to the acclaimed vocal-oriented V7, the V7 X is a dynamic instrument microphone ideal for a broad range of instrumental applications - both in the studio and on stage. Its specialized capsule's innovative aluminum voice coil and brand new acoustic design are specifically tailored for full-bandwidth instrumental reinforcement & recording, with a perfect balance of detailed highs and deep, ultra-powerful lows, allowing for use on nearly any source from electric guitar cabinets to brass instruments, snare drums to choir, and many more. In a world crowded with dynamic microphones - and largely led by a small handful of industry standards - the V7 has rapidly achieved high praise from both artists and reviewers alike with its stunningly realistic sound quality, immense gain before feedback, and superior off-axis rejection. **THE HEART OF THE V7 X: THE DMC7 X CAPSULE** The all-new custom DMC7 X capsule offers the same technologies and features as its sibling within the V7, including its innovative, specialized aluminum voice coil. While the V7 is optimized for vocals, the capsule in the V7 X has been custom-tuned for instrumental use. The upper frequency range is smooth & balanced, capturing every nuance of the player, while the lowered resonance and extended, powerful low frequency response allows for a complete spectrum of instruments: 4x12 guitar cabs, toms, snares, horns, rotary organs, or any other instrument all come through loud, natural, and clear. The supercardioid pattern of this sophisticated capsule also helps isolate your instruments from other sound sources on the stage - efficiently reducing stage bleed and ensuring copious amounts of gain before feedback. Proven neodymium magnets, tight production tolerances and high workmanship ensure excellent sensitivity, high-end sound quality and superb consistency. **ALL-METAL HOUSING & BEVELED SPRING STEEL GRILLE** The V7 X's road-ready design is all metal - no plastic parts here. The chassis' high quality, highly durable zinc alloy is designed to hold up under on-stage stress for years, and the spring steel mesh grille is dent-proof and corrosion-free for perfect reliability. And see that beveled edge around the grille? This prevents the V7 X from rolling when set down on top of an amp or the stage floor. **UNIQUE, PATENTED INTEGRATED CAPSULE SUSPENSION** The V7 X's advanced internal capsule suspension efficiently decouples the capsule from mechanical vibration, isolating it from shocks & jolts and providing exceptionally low rumble and handling noise as compared to other mics in its class. **INTERNAL**

WINDSCREENThe red internal windscreen efficiently reduces unwanted wind noise - and in case you prefer a more visually subtle black windscreen, we have also included one as a standard accessory.GOLD-PLATED XLR CONNECTORThe V7 X's gold-plated XLR connector also ensures a loss-free and reliable signal connection for years to come.IN THE BOXmicrophonic clipthread adapterblack internal windscreenE logo stickeruser manual

Specifications

- Capsule: Dynamic
- Voice Coil: Aluminum
- Magnet: Neodymium
- Directional Pattern: Supercardioid
- Frequency range: 30 Hz - 19 kHz
- Impedance: 300 Ohms
- Sensitivity: 2.0 mV/Pa (-54 dB)
- Connectivity: 3-pin male XLR
- Diameter: 47 mm x Length: 176 mm
- Weight: 269 g
