Samson Go Mic Mobile Handheld System

Samson Go Mic Mobile Handheld System Professionellt trådlöst mikrofonsystem med handmikrofon avsett för videoinspelning med mobiltelefon.

As smartphones have grown more powerful, there's been a huge shift towards digital media creation and consumption on mobile devices.

Smartphones have already met the demands for stunning video, but whether you're a filmmaker, mobile journalist, vlogger, streamer, videographer or anyone that creates video content, you know the audio is just as integral of a component to the final project. Go Mic Mobile is the first professional wireless microphone system that connects directly to smartphones without the need for cumbersome adaptors or interfaces, turning your phone into a pro-level video camera capable of capturing high definition audio anywhere.

Samson's Go Mic Mobile är ett professionellt trådlöst mikrofonsystem som kopplas enkelt direkt till en smartphone utan besvärliga adaptorer eller interface, vilket gör att telefonen blir en proffs-videokamera med högupplöst ljud. Go Mic Mobile inkluderar ett 2-kanals digitalt trådlöst system som automatiskt väljer den tydligaste frekvenskanalen, vilket resulterar i upp till 30m kristallklart ljud och fångar ljudet av dina berättelser, utan fördröjningar och kablar i bild. Systemets mottagare fästes direkt på telefonen, surfplattan, digitalkameran eller på stativ med hjälp av medföljande monteringsstillbehören. Anslut bara Go Mic Mobile till din iOS-enhet via den medföljande lighting-kabeln, Android-enheter via USB Micro B eller USB-C-kablar (båda medföljer), digitalkameran, videokameran eller datorn och börja spela in. Mottagaren erbjuder upp till 13 timmars batterilivslängd från det inbyggda uppladdningsbara batteriet.

Samson Go Mic Mobile Receiver

Samson Go Mic Mobile Receiver Mottagare till Go Mic Mobile

As smartphones have grown more powerful, there's been a huge shift towards digital media creation and consumption on mobile devices.

Smartphones have already met the demands for stunning video, but whether you're a filmmaker, mobile journalist, vlogger, streamer, videographer or anyone that creates video content, you know the audio is just as integral of a component to the final project. Go Mic Mobile is the first professional wireless microphone system that connects directly to smartphones without the need for cumbersome adaptors or interfaces, turning your phone into a pro-level video camera capable of capturing high definition audio anywhere.

Allt eftersom smartphones har blivit kraftfullare har det skett en stor förändring när det kommer till digitalt mediaskapande och konsumtion på mobila enheter. Smartphones har redan uppfyllt kraven på fantastisk video, men om du är filmskapare, mobil journalist, vlogger eller streamare, så vet du att ljudet är lika viktigt för slutresultatet. Go Mic Mobile är det första professionella trådlösa mikrofonsystemet som kopplas direkt till en smartphone utan att behöva besvärliga adaptrar eller ljudkort, vilket gör telefonen till en proffsvideokamera som kan återge högupplöst ljud överallt. Go Mic Mobile-mottagaren fästs direkt på smartphones, surfplattor, digitalkameror och stativ med hjälp av medföljande monteringsstillbehör.
