

## Produktblad Whirlwind SELXL

Whirlwind SELXL Push to talk XLR A-B switch

The SelectorXL is a programmable footswitch device that provides two signal paths for a microphone with independent muting of each path. Switching between outputs is completely silent and noise free.

- <li> Silent A/B switching at mic levels thru both XLR outputs
- <li> Advanced circuitry eliminates popping, noise and level changes
- <li> Dipswitches provide full configuration of switching modes
- <li> Outputs are protected from external Phantom power
- <li> Full 48VDC phantom power to input jack
- <li> Power supply (230v/24v not included) required for Phantom power
- <li> Bright LEDs indicate output ON status
- <li> Heavy-duty steel enclosure
- <li> Easy access for battery replacement
